

# Better engine oils

Power to protect. Power to perform.

## TOP ATF DX II

**PRODUCT CODE: TO2502**

**TOP ATF DX II** is a high quality, high performance automatic transmission fluid containing viscosity improvers, anti-wear and anti-foam additives, friction modifiers and anti-oxidants for long life stability. Dyed red for identification purposes. Is designed for use in automatic transmissions manufactured by General Motors, Vauxhall and Opel. It may also be used in Ford vehicles having red dipsticks. Can also be used as a power steering fluid in the appropriate vehicles.

### BENEFITS:

- Protection against wear
- Low foaming tendencies
- Can be used as a power steering fluid
- High temperature stability
- Formulated to meet the following requirements
- Suitable for use with Dennison, Sperry Vickers, and Sunstrand hydraulic pump systems.

Exceeds the following performance requirements:

- GM Dexron II
- Allison C3
- Caterpillar TO-2

### TYPICAL ANALYSIS:

|                                   |               |
|-----------------------------------|---------------|
| Specific Gravity @ 15.6°C         | 0.883         |
| Kinematic Viscosity @ 100°C (cSt) | 6.80          |
| Flash Point (°C)                  | 210           |
| Copper Corrosion                  | Nil           |
| Brookfield Viscosity @ 23.3°C     | 4,000 cP max  |
| @ -40.0°C                         | 50,000 cP max |
